

Home

Vision: Researchers from all disciplines have easy, integrated and open access to the advanced digital services, scientific instruments, data, knowledge and expertise they need to collaborate to achieve excellence in science, research and innovation.

Mission: The EOSC-hub project mobilises providers from the EGI Federation, EUDAT CDI, INDIGO-DataCloud and major research e-infrastructures offering services, software and data for advanced data-driven research and innovation. These resources are offered via the Hub – the integration and management system of the European Open Science Cloud, acting as a single entry point for all stakeholders.

Objectives

O1 Simplify access to a broad portfolio of products, resources and service provided by the major pan-European and international organizations through an open and integrated service catalogue.

O2 Remove fragmentation of service provisioning and access to high-quality digital services in Europe and beyond through the technical integration and adoption of standards for interoperability of compute, storage, data and software platforms.

O3 Consolidate e-Infrastructures by expanding capacity and capabilities and improving service quality.

O4 Widen the access to services to all user groups including researchers, high-education, business organizations and expand the user base.

O5 Provide a knowledge hub.

O6 Increase innovation capacity of Research e-Infrastructures.
