EUDAT and OpenAIRE have agreed on export policy and data acquisition: B2FIND will operate as aggregator of B2SHARE data sources on behalf of OpenAIRE. To this aim, B2FIND will need to export its metadata according to the OpenAIRE guidelines and make the collection available from an FTP end point. In the future, B2FIND will develop the required OAI-PMH APIs, today not supported by the underlying CKAN technology out-of-the-box. The implementation is ongoing and will be completed by the end of 2020.

## Action log

| Date | Action | Who | Comment |
|------|--------|-----|---------|
|      |        |     |         |
|      |        |     |         |
