The present Annex presents the activities tasks that form the EOSC-hub/OpenAIRE-Advance Joint Activity Plan. The present work plan is expected to produce results for a broad range of stakeholders, including: Research groups (e.g., Research Infrastructures, research projects, collaborations, and the long tail of science), decision makers and policy makers at national and European level, citizens, Industry/SME, service and content providers, and research administrators and managers.

The joint activity plan includes three activities and a number of tasks per activity:

- Joint activity JA1: Service Integration
- Joint activity JA2: Communications, Engagement, Support and Training
- Joint activity JA3: Governance and Strategy

The Results and activities of the Joint Activity Plan are periodically reported upon, and described in two deliverables, at PM18 and PM36 (see "List of Deliverables").

Progress of the Joint Activity Plan in each of the joint activities is defined by milestones and the related timeline.

The deliverables and milestones timeline unit is the Project Month (PM). Project Months are counted started from January 2018.

For each joint activity, tasks are jointly coordinated by one EOSC-hub coordinator and one OpenAIRE-Advance coordinator – the "Task Coordinators" – as described in the sections below.
