

Knowledge Transfer

What is the Knowledge Transfer Theme about?

This Theme ensures the cross-fertilisation and knowledge transfer of new technologies, best practices, approaches and policies of the Research Infrastructures by generating training material for Research Infrastructure personnel, build platforms and training material for (scientific) users of the Research Infrastructures, set up a specific training program for Environmental Research Infrastructure managers and facilitate inter-Research Infrastructure knowledge transfer via a dedicated cross-domain staff exchange program; Besides this focus on staff and persons directly related to Research Infrastructures, this theme will also reach out and develop training material for secondary school students and teachers, to introduce them in an attractive way with issues involved with environmental research and the role of the Research Infrastructures within this research.
