Overview

Service name	Service area	Service phase	Tagline	Service owner *	Action required *
B3. Dynamic Real-time Infrastructure Planner (DRIP)	compute	alpha	Optimised infrastructure planning and provisioning for time-critical applications.	UvA (University of Amsterdam)	
A4. Architecture Design	consultancy				
C3. Data / metadata generation from semantic annotations					
C1. Data Subscription Service	Discovery of data set changes and user notification	Working Proof of Concept	Discover change data sets through data or metadata changes	EUDAT operated by CSC - IT Center for Science	
C4. Dynamic ecological Information Management System (DEIMS)	Discovery of (meta)data of RIs	Production	Comprehensive database of environmental research sites	LTER Europe	
A3. ENVRI Knowledge Base		Beta		University of Amsterdam	
D1. ENVRIplus Service Testbed based on EGI Cloud Compute	Compute, storage	Production: service available in the live environment meeting security/performance requirements		EGI Foundation	
B2. gCube / D4Science DataMiner	Data processing and analytics	Production	Open, user friendly and extensible data analytics platform ready for Open Science and VREs.	D4Science.org	
B1. Linked open data ingestion and metadata service	data			ICOS	
A2. Open Information Linking for Environmental science research infrastructures	data	alpha	Open linking between environmental science RI reference modelling and controlled vocabularies.	Paul Martin	
B5. Flagship product catalogue	discovery of data and acquisition services	under development	discover what data or experiment hosting support you can get from the European environment Research Infrastructures.	ENVRIplus project; Operated by EUDAT /DKRZ	
A1. RM Training: Practical Introduction to the ENVRI RM	Reference model Training	beta: service being developed while available for testing publicly		Cardiff University
