

Architecture

Introduction defining context and scope

Change history and amendment procedure

The review of this topic will be organised by Keith Jeffery in consultation with the following volunteers: and . They will partition the exploration and gathering of information and collaborate on the analysis and formulation of the initial report. Record details of the major steps in the change history table below. For further details of the complete procedure see item 4 on the [Getting Started](#) page.

Note: Do not record editorial / typographical changes. Only record significant changes of content.

Date	Name	Institution	Nature of the information added / changed

Sources of information used

Two-to-five year analysis

State of the art

Trends

Subsequent headings for each trend (if appropriate in this HL3 style)

Problems to be overcome

Sub-headings as appropriate in HL3 style (one per problem)

Details underpinning above analysis

Sketch of a longer-term horizon

Relationships with requirements and use cases

Summary of analysis highlighting implications and issues

Bibliography and references to sources
