

T8.5 EPOS-ORFEUS

This page is Public

About

The CC drives collaboration between EOSC-hub and the ORFEUS-EIDA federation of EPOS. The CC will collect, analyse, compare the requirements of the solid-Earth science community, with a specific focus on Seismology, and address them leveraging the EOSC-hub technical offerings. The CC will deliver a software platform that will facilitate access and exploitation of computational resources; support and foster harmonisation of best practices for data management at ORFEUS-EIDA; enable generation of user-driven seismological products

Primary contact (SURFsara)

[Hans van Piggelen](#) (SURFsara), [Luca Trani](#) (KNMI), [Javier Quinteros](#) (GFZ)

Team

Participant	Name and Surname
KNMI	Luca Trani
SURFsara	Hans van Piggelen
GFZ	Javier Quinteros
INGV	Massimo Fares
NOA	Nikos Triantafyllis
