## Introduction to ANAEE

AnaEE (analysis and experimentation on ecosystems) ([www.anaee.com/](http://www.anaee.com/)) is a research infrastructure that focuses on providing services for experimental manipulation of managed and unmanaged terrestrial and aquatic ecosystems. It will strongly support scientists in their analysis, assessment and forecasting of the impact of climate and other global changes on the services that ecosystems provide to society. AnaEE will help to predict in a precise manner the response of the main continental ecosystems to environmental and land use changes. It will support scientists and policymakers to develop solutions to the challenges of food security and environmental sustainability, with the aim of stimulating the growth of a vibrant bioeconomy.

AnaEE entered the Preparatory Phase in November 2012. The consortium is currently composed of [14 partners from 10 countries](#). AnaEE's building blocks will include state of the art *in natura* and *in vitro* experimental platforms equipped with the latest technology, associated with sophisticated analytical and modeling platforms coupled to observation and monitoring sites that will provide indispensable calibration and validation of datasets throughout Europe.

## Requirements gathered

### General requirements

General requirements of ANAEE

### Identification and citation

Please see the page [Identification and Citation for AnaEE](#) for the responses of AnaEE to the questionnaire on this topic!

### Curation

“excerpt-include”

No link could be created for 'ERR:Curation requirements of AnaEE'.

### Cataloguing

“excerpt-include”

No link could be created for 'ERR:Replace with "Cataloguing requirements of <RI>" page'.

### Processing

“excerpt-include”

No link could be created for 'ERR:Replace with "Processing requirements of <RI>" page'.

## Optimisation

**"excerpt-include"**

No link could be created for 'ERR:Replace with "Optimisation requirements of <RI> page".'

## Provenance

**"excerpt-include"**

No link could be created for 'ERR:Replace with "Provenance requirements of <RI>" page'.

## Community support

**"excerpt-include"**

No link could be created for 'ERR:Replace with "Community support requirements of <RI>" page'.

## Summary and conclusions
